dentaform® Snap Bands · welded and unwelded / Assortments

Roth 18 and 22

For the practitioner who prefers a harder stiffer quality. Very good fitting accuracy coupled with a perfect edge closure. Ideal for the extra-oral technique (Face Bow or SUS²). Quick and easy sizing to select the correct band by determining the largest mesial-distal diameter of the tooth crown with our dental vernier REF 042-751-00.
Every assortment will be delivered in a tray that fits into our band cabinet REF 890-414-00.

Optimal adhesion
Rough interior surfaces guarantee a secure fit.

dentaform® Snap Bands · welded and unwelded / Single Packs

Roth 18 and 22

For the practitioner who prefers a harder stiffer quality. Very good fitting accuracy coupled with a perfect edge closure. Quick and easy sizing to select the correct band by determining the largest mesial-distal diameter of the tooth crown with our dental vernier REF 042-751-00.

Optimal adhesion
Rough interior surfaces guarantee a secure fit.

CE 0483

dentaform® Bands · welded and unwelded / Single Packs

Roth 18 and 22

Anatomically shaped bands for the fixed appliance technique. Easy to apply due to the high flexibility of the band. Quick and easy sizing to select the correct band by determining the largest mesial-distal diameter of the tooth crown with our dental vernier REF 042-751-00.

Optimal adhesion
Rough interior surfaces guarantee a secure fit.

Upper 1. molar bands, right

dentaform® Bands · welded and unwelded / Single Packs

Roth 18 and 22

Anatomically shaped bands for the fixed appliance technique. Easy to apply due to the high flexibility of the band. Quick and easy sizing to select the correct band by determining the largest mesial-distal diameter of the tooth crown with our dental vernier REF 042-751-00.

Optimal adhesion
Rough interior surfaces guarantee a secure fit.

For additional information see page 388

Standard Bands · welded and unwelded / Single Packs

Roth 18 and 22

Universally applicable for right and left halves of the arch. Quick and easy sizing to select the correct band by determining the largest mesial-distal diameter of the tooth crown with our dental vernier REF 042-751-00.

Optimal adhesion
Rough interior surfaces guarantee a secure fit.

Lower 2. bicuspid bands, right and left

Standard Bands · unwelded / Single Packs

Universally applicable for right and left halves of the arch. Quick and easy sizing to select the correct band by determining the largest mesial-distal diameter of the tooth crown with our dental vernier REF 042-751-00.

Optimal adhesion
Rough interior surfaces guarantee a secure fit.

Lower cuspid bands, right and left
