**Naturally aesthetic  
and comfortable.**

discovery® pearl brackets are manufactured from highly pure, polycrystalline aluminium oxide in a clean, modern process. This improves the aesthetic value by allowing the majority of light to filter through this innovative bracket without creating a reflection. Due to these features, the shade of the bracket simulates the natural tooth shade.

In combination with the aesthetic benefits, the optimal size and low-profile height of these brackets provide excellent comfort for the patient during treatment.

Since discovery® pearl brackets are virtually invisible and adapt perfectly to their natural tooth surroundings, you can be absolutely certain that they will leave others only admiring you for your beautiful smile!

discovery® pearl –  
naturally the clear choice for  
aesthetic orthodontic treatment.

*“THE PEARL IS THE EPITOME  
OF NATURAL BEAUTY.  
IT DEVELOPS INSIDE AN OYSTER  
AND REQUIRES TIME  
TO MATURE TO PERFECTION.”*

discovery® pearl – the new highly aesthetic all-ceramic bracket from Dentaaurum – has evolved over three years of development to become the new standard in aesthetic tooth correction.

Due to its high translucency, optimal shade and size discovery® pearl seems virtually invisible – and also functions so effectively that your teeth soon radiate perfect beauty!

**Naturally efficient – the ideal bracket.**

discovery® pearl is not only impressive to those who demand the highest levels of aesthetics, but also to those who would like to have a bracket that fulfills all the requirements you expect from effective tooth correction.

The strength of the compact discovery® pearl bracket is based on a proven design, which ensures optimum and efficient treatment outcomes. Its high quality guarantees maximum hygiene and prevents discoloration of the brackets throughout the duration of treatment.

If you place great value on tooth correction that is both effective and aesthetic, then ask your orthodontist about the new fascinatingly natural discovery® pearl!
