

NON-OSSEOINTEGRATED IMPLANTS

documentation form

Please send the following **within two months** of the implant failing to Dentaurum Implants GmbH | Turnstr. 31 | 75228 Ispringen | Germany:

■ Non-osseointegrated implant (**sterilized**)

■ Fully completed documentation form

– Please use one documentation form only per patient –

1. Details of Dealer:

Name _____

Country _____

Customer No. _____

2. Details of operator, surgeon:

Name _____

Telephone number _____

Street _____

Customer number _____

Postal code / City _____

Country _____

3. Details of prosthetist:

Name _____

Tel. No. _____

Street _____

Customer No. _____

Postal code / City _____

Country _____

4. Details of patient

4.1 General data

Age _____

Gender male female

4.2 Habits, health factors

Alcohol

Bruxism

Smoking

Unfavorable occlusion
(deep overbite, edge-to-edge bite)

Insufficient oral hygiene

Unusual biting habits (nail biting)

Serious systemic disease
(diabetes)

Further information relevant to treatment

4.3 Bone quality / augmentation

D1 (dense compact bone)

D3 (thin, porous compact bone /
wide-meshed cancellous bone)

D2 (porous compact bone /
dense cancellous bone)

D4 (almost no compact bone /
wide-meshed, fine cancellous bone)

Augmentation yes no

Details of augmentation material _____

5. Details on implantation / loss of implant

5.1 Implant data

	Implant designation (length and ø of implant)	REF	LOT	Inserted in region	Date of imp- lant insertion	Date of implant exposure	Date of prosthetic restoration	Date of imp- lant removal
1	L ø							
2	L ø							
3	L ø							
4	L ø							

5.2 Prosthetic restoration

- Single tooth Ball abutment
- Bridge LOCATOR®
- Bar Telescope

Connector geometry*: Conical Platform

5.3 Details on implant loss

- Type of implant loss: Independent loss
- Surgical explantation

- Reasons for implant loss:
- Connective tissue healing
 - Radiologic osteolysis
 - Peri-implantitis
 - Chronic problems
 - Loaded before exposure
 - Loaded during gingiva forming
 - Incorrect loading from superstructures
 - Abutment fracture
 - Insufficient oral hygiene
 - Other reasons (description):

- Procedure following implant loss:
- New implant, immediately
 - Implantation after healing
 - Implantation at different location
 - No insertion of new implant

6. Regulations and instructions for surgical treatment

Are any general regulations for surgical treatment available?
(e.g. regarding rooms, staff, clothes, instruments)

Are the Instructions for use for implant systems from Dentaaurum Implants available?

7. Which articles from Dentaaurum Implants were used for surgical treatment?

- Surgical Tray for tioLogic® TWINFIT Osteotomy Tray for tioLogic®
- Surgical Tray STANDARD for tioLogic® TIOMESH accessories
- Surgery Tray ADVANCED for tioLogic®
- Surgery Tray easyClean for tioLogic®
- Surgical Tray pOosition for tioLogic®

Place, date, signature operator

* Exclusively for tioLogic® TWINFIT.
