Innovative order platform for  
patient-specific products and services.

passion and precision.

**DENTAURUM**  
**DIGITAL**

Innovative order platform for  
patient-specific products and services.

## **2 splint system:**

Innovative splint concept for the best  
treatment results.

» Effective | Precise | Aesthetic | Competent

Orthodontic aligner therapy  
from Dentaaurum.

### Advantages:

- ” Digital case planning with OnyxCeph<sup>3™</sup>.
- ” Aligner covers part of the gingiva for better transfer of forces.
- ” Transparent aligner material for almost invisible therapy.
- ” Personal consultation from an experienced support team.

**DENTAURUM**  
**DIGITAL**

Innovative order platform for patient-specific products and services.

### **prime4me® model print.**

Printed base models and dental arch models for orthodontics are produced with maximum precision, providing an ideal basis for the fabrication of orthodontic appliances. As always, Dentaurum stays true to its own demands on quality: top industry standard for machines and validated processes together with highly qualified personnel.

**prime4me® RETAIN3R offers numerous benefits.**

The retainer is designed according to the customer's wishes using a unique three-dimensional construction design, guaranteeing a perfect fit. The digital design also works for situations where space is limited. The material, titanium grade 5, is biocompatible, making the prime4me® RETAIN3R highly suitable for patients with a nickel allergy.

Once the design has been approved, the retainer is milled one-to-one from a titanium blank. This ensures the patient will find the retainer comfortable to wear as its lingual fit is ideal and the adhesive surfaces are smaller. This, in turn, also helps improve and ease oral hygiene.

Dental imaging software.

With OnyxCeph<sup>3TM</sup>, Image Instruments set the benchmark for dental imaging software. The comprehensive solutions for archiving, diagnostics, treatment planning and patient education are used by customers in more than 99 countries around the world – with an impressive list of successes.

## Treatment planning and areas of application:

Module Ortho Apps 3D

Module FA\_Bonding 3D

Module Kylix 3D

Module Bonding Trays 3D

Module Retainer 3D

Module Aligner 3D

## OnyxCeph<sup>3TM</sup> – Program versions and optional modules for the ideal combination with laboratory scanners or TRIOS.

### prime4me® Aligner

After checking your data, our team will suggest a suitable aligner package for you.

Designation	REF	Quantity
prime4me® Aligner smart	430-140-20	1 case
prime4me® Aligner advanced	430-141-21	1 case
prime4me® Aligner performance	430-142-21	1 case

**NEW**

### prime4me® base model

Printed base models for orthodontics.

REF 430-110-10

1 piece

### prime4me® dental arch model

Printed dental arch models for orthodontics.

REF 430-110-30

1 piece

Order now:  
[digital.dentaurum.de](https://digital.dentaurum.de)

### 3D separating medium

Forms a separating layer between the acrylic models and Orthocryl® / Orthocryl® LC.  
Color: green

REF 162-801-00

100 ml

### prime4me® RETAIN3R maxilla

Unique fit using a three-dimensional construction design and highest biocompatibility: milled retainer in grade 5 titanium. Can be ordered together with prime4me® RETAIN3R optionally: Transfer tray for prime4me® RETAIN3R for placement in the mouth.

REF 430-120-30

1 piece

### prime4me® RETAIN3R mandible

Unique fit using a three-dimensional construction design and highest biocompatibility: milled retainer in grade 5 titanium. Can be ordered together with prime4me® RETAIN3R optionally: Transfer tray for prime4me® RETAIN3R for placement in the mouth.

REF 430-120-40

1 piece

### Transfer tray

Transfer tray for prime4me® RETAIN3R for placement in the mouth.  
Can only be ordered together with prime4me® RETAIN3R.

REF 430-120-90

1 piece

**NEW**

### Orthodontic demonstration model prime4me® RETAIN3R

For patient demonstration.

#### Fitted with:

- prime4me® base model
- prime4me® RETAIN3R upper jaw
- transfer tray for prime4me® RETAIN3R

REF 892-000-29

1 piece

## Expansion screws without retention legs, for digital workflow

### hyrax® click Mini – 7

**RPE screw with click feature to prevent unwanted reversing**

**For effective and reliable rapid palatal expansion by means of fixed appliances.**

- optimal screw locking during the active treatment phase
  - reliable activation / deactivation of the screw with clearly perceptible click after a  $\frac{1}{4}$  turn
  - no accidental reversing when pulling out safety key during activation
  - built-in stops prevent the screws from coming apart once maximum expansion has been obtained
  - small dimensions with maximum expansion
  - offset body for earliest possible angling of the retention legs
  - permanently laser marked arrow on the body of the screw indicates the opening direction and max. expansion
- Pack (1 piece) with 1 safety key, pack (10 pieces) with 10 safety keys.

Screw body: 9.8 mm

Maximum expansion: 7.0 mm

$4 \times \frac{1}{4}$  turn = 0.8 mm

Material: stainless steel

Retention legs	REF	Quantity	REF	Quantity

### Variety click SP (small palate) Mini – 8

**Monoguided special expansion screw with click feature to prevent unwanted reversing. For the fixed appliance technique. Can be widely used in the upper and lower jaw, for distalization, mesialization of posterior teeth, or for space closure by moving individual teeth. Also for early palatal expansion.**

- optimal screw locking during the active treatment phase
- especially suitable for very narrow jaws
- retention legs can be bent very close to the screw body
- small dimensions with maximum expansion
- reliable activation / deactivation of the screw with clearly perceptible click after a  $\frac{1}{4}$  turn
- permanently laser marked arrow on the body of the screw indicates the opening direction and max. expansion

Pack (1 piece) with 1 safety key, pack (10 pieces) with 10 safety keys.
