

## ADVANTAGES FOR YOU

- ✓ Design based on customer requirements; individual product advice from our CAD/CAM specialists.
- ✓ The three-dimensional construction design ensures an optimum, individual fit, even where space is tight.
- ✓ 3D design is more precise than 2D: additional vertical fit to the sagittal and transverse plane.
- ✓ Highest degree of biocompatibility: milled retainer in Grade 5 titanium.
- ✓ Due to the precise fit, there is only one position for the retainer on the teeth that is correct. It can therefore be fitted easily and tension-free.
- ✓ 24 month guarantee
- ✓ Fast delivery: Transfer to shipping department after 5 working days, receipt of order up to 12 noon.

## ADVANTAGES FOR YOUR PATIENTS

- ✓ Best possible comfort thanks to precise fit lingually and smaller bonding surfaces.
- ✓ Oral hygiene is easier and better due to the flat cross-section profile which has been optimized (3D half-round).
- ✓ Highest level of biocompatibility and tolerance: also suitable for patients suffering from a nickel allergy.

*"Awesome! Easy, fast and barely noticeable."*

# APPLICATION EXAMPLES

## Orthodontics

Image 1: The prime4me® RETAIN3R offers much freedom for design in all spatial planes.

Image 2: Deep overbite presents no problems when designing the prime4me® RETAIN3R.

Image 3: Extension of prime4me® RETAIN3R up to bicuspid, after cuspid has been displaced, exposed and aligned. Photo Dr. Inge Kiegel-Koller (Bergheim, Germany).

## Periodontology

Image 4: The prime4me® RETAIN3R offers much freedom in design. It can be adapted to the specific tooth position and, for example, give stability to teeth that are loose due to periodontal disease.

Image 5: Tooth 11 is stabilized by the prime4me® RETAIN3R. Photo Drs. Elisabeth and Martin Orleth (Nürtingen, Germany).

Image 6: Very loose incisor is splinted using the prime4me® RETAIN3R. Photo Prof. Paul-Georg Jost-Brinkmann (Berlin, Germany).
