

### Physical Properties & Test Methods

| Norm  | Chapter | Property                                                               | Requirement                              | Typical Values         |
|-------|---------|------------------------------------------------------------------------|------------------------------------------|------------------------|
| 13356 | 4.1     | Density<br>[acc.. ISO 18754 or EN 623-2]                               | $\geq 6,00$ [g/cm <sup>3</sup> ]         | 6,05                   |
| 13356 | 4.3     | Microstructure: Mean linear intercept<br>[acc.. EN 623-3 or ASTM E112] | $\leq 0,4$ [ $\mu$ m]                    | 0,35                   |
| 6872  | 4.4     | Biaxial Bending Strength                                               | $\geq 800$ [MPa]                         | 1400                   |
| 13356 | 4.6     | Zycl. Fatigue                                                          | $\geq 320$ [MPa]                         | Successful, no failure |
| 13356 | 4.7     | Radioactivity                                                          | $\leq 200$ [Bq/kg]                       | 15                     |
| 6872  | 7.4     | Coefficient of Expansion                                               | Bestimmung [ $10^{-6}$ K <sup>-1</sup> ] | 10                     |
| 6872  | 7.6     | Chem. Solubility                                                       | 2.000 [ $\mu$ g/cm <sup>2</sup> ]        | 12                     |

### Chemical Composition

| NORM  | KAPITEL | MERKMAL                  | ELEMENTE – OXIDE                                                    | ANFORDERUNG            | Typische Werte |
|-------|---------|--------------------------|---------------------------------------------------------------------|------------------------|----------------|
| 13356 | 4.2     | Composition<br>in mass % | ZrO <sub>2</sub> + HfO <sub>2</sub> + Y <sub>2</sub> O <sub>3</sub> | $\geq 99,0$            | 99,90          |
| 13356 |         |                          | Y <sub>2</sub> O                                                    | $> 4,5$ bis $\leq 6,0$ | 5,50           |
| 13356 |         |                          | HfO <sub>2</sub>                                                    | $\leq 5$               | 1,90           |
| 13356 |         |                          | Al <sub>2</sub> O <sub>3</sub>                                      | $\leq 0,5$             | 0,002          |
| 13356 |         |                          | other oxides                                                        | $\leq 0,5$             | $\leq 0,5$     |
